CABLE EXTENDER

APPLICATION

Titanium adapter for joining two lengths of RuggedCable™. Twist-Lock connectors mate with connectors on cable.

PHYSICAL DESCRIPTION

Wetted materials	Titanium, Viton®
Size	9.8 cm (3.8 in) long, 18.3 mm (0.72 in) O.D.

CONNECTIONS

1. Remove the protective dust caps from the adapter and cables. The cable ends are identical, and both sides of the adapter are identical, so orientation is not important.
2. Attach the Cable Extender to each piece of cable:

Attaching cables or accessories is a simple matter of mating the Twist-Lock connectors. This is easy after you've done it once or twice. For detailed steps and photographs, see the Product Quick Start Guide, or refer to the Operator's Manual located on the software CD.

GUIDELINES & PRECAUTIONS

- Soft dust caps protect the connectors during shipping. Keep the dust caps to protect the pins and o-rings when the connectors are not mated.
- Be sure you hear a "click" when the connectors lock together. The "click" ensures the cable is securely attached.
- There is no limit to the number of cable extenders that may be used. However, long cable lengths will lower optimal communication speed and increase data download time.
- Replacement o-rings are available from In-Situ Inc. or your distributor.
